

# Drywall Dolly

## Description

Material: Welded steel tubing with deck construction, round cornered prevent board or wall damage

Load Capacity: 10" Wide base for 20 sheets of drywell loading

Construction: 8" Wheels (2 fixed, 1 swivel and 1 swivwl brake)

Different size of dolly base can be 10", 12", 14"

Easy moving and folding into a 1300 X 600 X 180 mm carton

UU hand rails for different handle. Open frame design turns tight

corners. Folding and welded 1 piece can be optional. Rubber,

TPR, PU and polyurethane wheels can be optional.

A nylon strap go from the top railer to the bottom rail to keep the

sheets from falling over while moving the product. The strap is

removable, you can take it off if you don't want it.
